Page 5 The software included in this section is very useful for the daily application of your computer. It has been divided into a few categories, including: Security (antivirus and firewall software, among others), System tools (windows os systems repair) and Audio & video (everything you need to play audio and video files on your computer). Players have a special category of software that is mandatory for gamers, such as GPU drivers, video game console emulation software and customers of various digital distribution platforms (such as Steam, Uplay and Origin). In the Software category, utilities are available free of charge (for non-commercial use) and can improve your computer's performance in a number of ways. The software includes codec packages, mandatory to play all types of movies, communicators, internet browsers, applications for opening and /or editing audio files and video clips, data download drivers etc. Of course, in the software tab there are also programs for players. These are: driver packages, required to get as many Radeon and GeForce GPUs as possible, emulators of hardware platforms (virtual computers and consoles - both new and old), applications to improve computer performance in video games, tools for creating/modifying games, software for configuring controls (such as game controllers), etc. Software shared by the software on our site is primarily used meant personal computers running Windows systems. There are both free full versions (freeware), as proof version (shareware).
